BE A BARRIER TO
SUCCESS.”**

- BOB SIEVWRIGHT / FOUNDER & OWNER

Founded in New Zealand in 1981, Trimax has grown from a modest workshop into a global business with facilities around the world. Today many of our mowers destined for United States turf are assembled or manufactured locally at our factory in Fayetteville, Georgia. Our global headquarters is still located where we began in Tauranga, New Zealand.

We are renowned for designing and manufacturing mowing systems which produce a high-quality cut, finish, and spread - but what we value most is the reputation we have earned for providing unmatched local support and service.

STRIKER

FAST BECOMING THE
MOWER OF CHOICE
AMONGST GROUNDSMEN.

Trimax STRIKER is a multi-spindled rotary mower with extremely low maintenance requirements and is ideal for use on compact tractors.

The Trimax Striker is designed to give a high cut quality and an excellent spread of clippings. Highly versatile, the Striker is capable of mowing grass $\frac{3}{8}$ " - 4". With an enclosed cutting chamber and a downward rear dispersion of clippings, the Striker has surpassed international safety standards making it one of the safest mowers on the market for use in public spaces.

Fitted with Trimax's exclusive LazerBladez™, the Striker can produce a cut and finish to rival that of a reel mower and is ideal for educational and sports facilities where presentation is key!

TALK TO US TODAY ABOUT THE CAPABILITIES OF
STRIKER IN YOUR ENVIRONMENT.

SPECIFICATIONS	150	190
Cutting Width	4' 9"	6' 4"
Overall Width	5' 11"	6' 8"
Overall Length	3' 10"	3' 10"
Height	2' 8"	2' 8"
Cut Height Range	$\frac{3}{8}$ " - 4"	$\frac{3}{8}$ " - 4"
No. of Blade Spindles	3	4
Approx. Weight	688lbs	846lbs
Min PTO Output	20hp	25hp

What used to take half a day now takes less than an hour, we can mow when the grass is wet, it doesn't scalp and we can stripe the fields. It's very impressive!

- PAUL CHEETHAM Immanuel Lutheran College, Sunshine Coast QLD, AUS

FITMENT

Rear 3-point linkage mounted compact tractor roller mower. Suitable for tractors with a minimum of 20hp.

DESIGN AND CONSTRUCTION

Trimax Striker incorporates a unique baffle design for improved grass distribution and less clumping. Engineered with a deep cut chamber, the Striker is able to deliver an even spread of cut out the back of the machine, creating a superb finish on sports turf.

Spindles are housed in maintenance-free fabricated steel housings with a large 6 bolt flange and each spindle has 2 Trimax LazerBladez™ mounted on spring steel blade beams.

The Striker uses a monocoque body construction from 5mm plate steel. With full width rollers front and rear the mower will not scalp over uneven ground. A comparably short mower front to rear coupled with a floating top link makes for excellent contour following. A proven and simple belt drive system using B section belts eliminates the chance of expensive gearbox damage and is easily adjusted.

APPLICATIONS

✓ Municipality ✓ Horticulture ✓ Golf Courses ✓ School ✓ Lifestyle ✓ Sports Turf

PRODUCT FEATURES

LOW COST OF OWNERSHIP

With only 4 grease points on the mower and with robust sealed spindles, the Trimax Striker has incredibly low maintenance requirements.

SAFETY FOR PUBLIC PLACES

Striker exceeds international safety standards, and can be used with confidence in public spaces, school sports turf and confined areas.

LAZERBLADEZ™

Available in up lift and flat formation to suit mowing requirements, the unique tilt forward design minimizes hang back in tough conditions.

ADVANCED ENGINEERING

Trimax's meticulous design process combined with bespoke, innovative manufacturing technologies produce the most accurate rotary cutting in the market.

STRIPING CAPABLE

Fitted with full width front and rear rollers, the Striker can produce striped patterned turf for those spaces where presentation is key.

COMPACT TRACTOR SUITABLE

Able to be paired with tractors as low as 20hp, the Striker is perfect for smaller budgets and compact tractors.

*OPTIONAL FEATURES

✓ HELICAL ROLLER SCRAPERS

Cleans rollers and reduces clumping in wet conditions.

✓ ON-CALL KIT

Each kit contains bearings, blades, and belts for a quick replacement in the field.

"The ProCut is the best mower I've ever had... it mows my polo field to perfection."
- CHRISTOPH GERBERDING | Polo Grounds, Milford, New Jersey

A highly versatile roller mower, the PROCUT SERIES 4 is a multi-spindled roller mower designed to give high cut quality and a great spread of clippings.

The ProCut has been a successful part of the Trimax range for over 40 years, mowing parks and reserves, school grounds and sports turf around the world – from the grounds of Windsor Castle to your local community sports turf.

The ProCut Series 4, released in 2018, is excellence refined. Now even easier to operate and maintain than ever before, the ProCut still retains many of the aspects that propelled it to become one of the best sports mowers on the market.

TALK TO US TODAY ABOUT THE CAPABILITIES
OF PROCUT SERIES 4 IN YOUR ENVIRONMENT.

FITMENT

Rear 3-point linkage mounted tractor roller mower. Suitable for tractors with a minimum of 35hp.

DESIGN AND CONSTRUCTION

Trimax mowers are engineered with a higher number of spindles than comparable rotary mowers and have shorter blade beams which give more cuts per forward unit of travel and a fine cut. Roller bearings have been mounted inboard for better protection and are easily greasable through the side channels. The ProCut uses a monocoque body construction from 5mm plate steel. A comparably short mower front to rear and a floating top link ensures contour following on uneven ground. A proven and simple belt drive system using B section belts eliminates the chance of expensive gearbox damage and is easily adjusted.

IMPROVEMENTS OVER THE PROCUT SERIES 3

Stand on covers make coupling to the tractor safer and new quick release latches and dual wash ports ensure easy maintenance and cleaning of the belt chamber. The new LocTEK stubless roller retention system and increased strength tri-bolt bearing housing reduces maintenance significantly. The 210 model now features extended side channels for improved long grass intake. RapidSET™ height adjustment and an improved PVK holding strip have also been introduced.

APPLICATIONS

✓ Municipality ✓ Horticulture ✓ Golf ✓ School ✓ Lifestyle ✓ Sports Turf ✓ Aviation ✓ Sod Farm ✓ Racecourse ✓ Polo

PRODUCT FEATURES

LOCTEK

A stubless roller bearing system for vastly improved roller retention, alignment, bearing life and minimal maintenance.

STEADFAST SEALED SPINDLES

We've eliminated the tedious task of regular greasing. Covered by our 3-year warranty, maintenance costs are reduced, and productivity is enhanced.

LAZERBLADEZ™

Available in uplift and flat formation to suit mowing requirements, the unique tilt forward design minimizes hang back in tough conditions.

STAND ON COVERS

Enables safe and easy access to the rear of the tractor when coupling the mower. Quick release latches allow easy removal for cleaning and servicing.

BELT CAVITY DUAL WASH FLAPS

Provides easy access for removal of grass and drainage of water from belt chamber.

RAPIDSET HEIGHT ADJUSTMENT

Clearly displayed stainless steel height indicators allow the easy adjustment of cut heights without having to raise or lower the deck.

FULL WIDTH ROLLERS

Full width rollers minimize scalping in undulating conditions and allow mowing over curbs and bunkers. Also aids in striping.

ADVANCED ENGINEERING

Trimax's meticulous design process combined with bespoke, innovative manufacturing technologies produce the most accurate rotary cut in the market.

*OPTIONAL FEATURES

✓ HELICAL ROLLER SCRAPERS

Cleans rollers and reduces clumping in wet conditions.

✓ ANTI-BOUNCE / WEAR SKIDS

Eliminates scalping and bouncing and reduces side channel wear.

✓ QUATTRO BLADES

Four blades (flat, upturned or mixed) per spindle for a finer cut.

✓ GALVANIZED SURFACE COATING

Protect against corrosion in harsh environments.

✓ ON-CALL KIT

Each kit contains bearings, blades, and belts for a quick replacement in the field.

STEALTH/S3

**MARKET LEADING CUT,
FINISH AND VERSATILITY.**

SPECIFICATIONS

340

Cutting Width	11' 2"
Transport Width	7' 11"
Overall Width	11' 8"
Overall Length	5' 4"
Height	3' 11 ½"
Cut Height Range	¾" - 3 ½"
No. of Blade Spindles	5
Approx. Weight	2194lbs
Min PTO Output	70hp

"We're mowing 7 hours a day and getting large areas done quickly. It's easily maneuverable and the contouring following ability of the wings and the ability to fold up them up with an in-cab transport lock is a huge advantage."

- JOHN ROSNELL | Springbrook Wholesale Nursery, Gold Coast QLD

FITMENT

Rear 3-point linkage mounted wide area roller mower suitable for tractors with a minimum of 70hp.

DESIGN AND CONSTRUCTION

Stealth Series 3 features 5 spindles (3 on the main body, 1 on each wing) for a finer cut than comparable width rotary mowers. The spindles are housed in maintenance-free fabricated steel housings with a large 6 bolt flange. Stealth's wings have up and down float for contour following ability and fold up (using hydraulic rams) to reduce mower width to 7'11" for road travel.

The Stealth uses a monocoque body construction from 5mm plate steel. Skids fitted to the outside of the wings are made from wear resistant steel for 3x longer life. A proven and simple belt drive system eliminates the chance of expensive gearbox damage and is easily adjusted.

IMPROVEMENTS OVER THE STEALTH SERIES 2

We've reduced the need for greasing through the introduction of new features such as SteadFast maintenance free spindles and composite maintenance free bushes. Stealth wing locks can now be operated from inside the tractor cab. Modifications have been made to the cutting chamber and the baffle design for higher quality of cut and easy cleaning.

APPLICATIONS

✓ Municipality ✓ Golf Courses ✓ School ✓ Sports Turf ✓ Aviation ✓ Racecourse

INDUSTRY LEADING WARRANTY

3
YEAR

& GEARBOXES
EXPERIENCED SERVICE
& SUPPORT NETWORK

PRODUCT FEATURES

LOCTEK

A stubless roller bearing system for vastly improved roller retention, alignment, bearing life and minimal maintenance.

LOW MAINTENANCE

Operators are no longer required to grease hinge points and spindles on a daily basis and can spend more time mowing and less time on maintenance.

LAZERBLADEZ™

Available in uplift and flat formation to suit mowing requirements, the unique tilt forward design minimizes hang back in tough conditions.

IN-CAB UNLOCK SYSTEM

Unlock the mower wings' transport lock from the convenience of the tractor seat using the tractor's hydraulic control lever.

GREATER MOWING VERSATILITY

The improved cutting chamber and baffle design directs airflow from the blades out and over the rear roller for a better cut and spread.

EASY TO CLEAN

The improved belt chamber design results in easy cleaning, with the front openings allowing any grass to be easily washed out or removed.

EASY HEIGHT ADJUSTMENT

Clearly displayed stainless steel height indicators allow the easy adjustment of cut heights without having to raise or lower the wings or deck.

*OPTIONAL FEATURES

✓ **HELICAL ROLLER SCRAPERS**
Cleans rollers and reduces clumping in wet conditions.

✓ **ON-CALL KIT**
Each kit contains bearings, blades, and belts for a quick replacement in the field.

BELT CAVITY DUAL WASH FLAPS

Provides easy access for removal of grass and drainage of water from belt cavity.

ANTI-WEAR SKIDS

Anti-wear skids reduce wear on side channels when operating in rough or uneven terrain.

STAND ON COVERS

Enables safe and easy access to the rear of the tractor when coupling to the mower. Quick release latches allow easy removal for cleaning and servicing.

SNAKE/S2

WORLD CLASS
CUT QUALITY AND
ARTICULATION.

The Trimax SNAKE is used on some of the most prestigious golf courses around the world. The cutting system has been studied by the Sports Turf Institute of New Zealand and declared to produce a cut of equal quality to reel mowers however with the versatility and reliability of our famous rotary design.

An accumulation of over 30 years of Trimax innovation, engineering, and customer insight, the Snake is the original roller mower designed specifically for sports turf and golf courses. We've seamlessly combined our world class cut quality and articulation capabilities and believe we've created the best sports turf rotary mower in the world. Built for agility, incredibly robust and extremely low maintenance, the Trimax Snake won't fail to impress.

TALK TO US TODAY ABOUT THE CAPABILITIES
OF SNAKE SERIES 2 IN YOUR ENVIRONMENT.

SPECIFICATIONS

	320	400
Cutting Width	10' 7"	13' 1"
Overall Width	11' 1"	13' 6"
Overall Length	11' 6"	11' 6"
Transport Width	6' 9"	7'
Transport Height	6' 1"	7' 4"
Cut Height Range	3/8" - 4"	3/8" - 4"
No. of Blade Spindles	9	11
Approx. Weight	2821lbs	3064lbs
Min PTO Output	*35hp	*40hp

Between the ease of height adjustment to the ease of maintenance and greasing and the minimal bearings and belts that have to be maintained - it's a great piece of equipment.

- WES HOLSENBECK | Equipment Manager, East Lake Golf Club, Atlanta

FITMENT

Trailed PTO driven multi-deck roller mower suitable for tractors with a minimum of 35hp.

DESIGN AND CONSTRUCTION

Each of Trimax Snake's three mowing decks have spindles fitted with LazerBladez™ that have very high spindle speeds which increase the number of cuts per forward unit of travel giving a finer cut than comparable rotary mowers. Folding for transport and easily towed behind a compact tractor, the Snake is a cost effective alternative to traditional and expensive self-contained options. Engineered with a low center of gravity and with transport locks, road transport of the Snake is safe and easy. The Snake uses a monocoque body construction from 5mm plate steel. A proven and simple belt drive system eliminates the chance of expensive gearbox damage. Automatic belt tensioners ensure maximum drive to the blades at all times.

IMPROVEMENTS OVER THE SNAKE SERIES 1

The Snake Series 2 includes the new Trimax LocTEK stubless roller bearing retention system. The roller thickness has been increased to 3/16". The Snake now features replaceable axle stubs, a 90 degree rotatable jack stand and maintenance free pivot bushes.

APPLICATIONS

✓ Municipality ✓ Golf ✓ School ✓ Sports Turf ✓ Sod Farm

PRODUCT FEATURES

LOCTEK

A stubless roller bearing system for vastly improved roller retention, alignment, bearing life and minimal maintenance.

FULL WIDTH ROLLERS

Full width rollers minimize scalping in undulating conditions and allow mowing over curbs and bunkers. Also aides in striping.

ZERO TURN

Allows continuous cutting while turning sharply for maximum productivity.

AUTOMATIC BELT TENSIONERS

Automatic belt tensioners eliminate the need for belt adjustments and improves drive to the spindles and blades.

QUIKLIFT

QuikLIFT enables decks to be raised slightly for traversing paths without the need to disengage the PTO. Also aides in striping.

ARTICULATION ABILITY

With three articulating decks the Snake has the ability to follow contours.

LAZERBLADEZ™

Available in uplift and flat formation to suit mowing requirements, the unique tilt forward design minimizes hang back in tough conditions.

EASY HEIGHT ADJUSTMENT

Clearly displayed stainless steel height indicators allow the easy adjustment of cut heights without having to raise or lower the decks.

LOW MAINTENANCE

SteadFast sealed spindles have eliminated the tedious task of regular greasing. Snake Series 2 now also features maintenance free pivot bushes.

*OPTIONAL FEATURES

✓ HELICAL ROLLER SCRAPERS

Cleans rollers and reduces clumping in wet conditions.

✓ MULCH KIT

Save on purchasing dedicated leaf blowing and collection units with the Snake Mulch Kit. Retrofittable to existing Snake S1 & S2 models.

✓ MUDGUARDS, LIGHTS, & CHAINS

Add LED tail light clusters, safety chains, and transport wheel mudguards for increased safety during road transportation.

✓ ELECTRIC UNLOCK

Replaces the standard in-cab transport lock release rope with an electric actuator. This is operated by a push button remote.

✓ ANTI-BOUNCE / WEAR SKIDS

Eliminates scalping and bouncing and reduces side channel wear.

✓ ON-CALL KIT

Each kit contains bearings, blades, and belts for a quick replacement in the field.

PEGASUS/S4

**THE BENCHMARK
IN WIDE AREA MOWING.**

The PEGASUS has established itself globally as the benchmark in wide-area mowing for parks, reserves, sports turf and sod farm.

The Trimax Pegasus was the world's first multi-deck roller mower and has been a successful part of the Trimax range for more than 20 years. The Pegasus has articulation capacity and is engineered to be incredibly robust for full-time commercial use.

Available in 16', 19' and 23' widths the Pegasus Series 4 is our newest and lowest maintenance version of the trailed mower. With its wide cutting widths and ability to mow at speeds up to 10mph on flat terrain, the Pegasus is one extremely efficient mower.

**TALK TO US TODAY ABOUT THE CAPABILITIES
OF PEGASUS SERIES 4 IN YOUR ENVIRONMENT.**

Approx. Weight	4806lbs	5311lbs	5952lbs
Min PTO Output	60hp	65hp	70hp

722
Available in
Spain only

FITMENT

Trailed PTO driven wide area mower suitable for tractors with a minimum of 60hp.

DESIGN AND CONSTRUCTION

Pegasus has 3 multi-spindle double roller mowing decks on a roadworthy chassis that folds to 8' 2" for road transport. Mowing decks have a physical safety lock and a safety lanyard for travel in the raised position. Pegasus comes standard with mudguards, lights and drawbar safety chains. With Trimax LazerBladez™ and multiple spindles with shorter blade beams, the Pegasus gives more cuts per forward unit of travel and produces a finer cut than comparable rotary mowers. The Pegasus uses a monocoque body construction from 5mm plate steel. A proven and simple belt drive system eliminates the chance of expensive gearbox damage and is easily adjusted.

IMPROVEMENTS OVER THE PEGASUS SERIES 3

The Pegasus Series 4 includes the new Trimax LocTEK stubless roller bearing retention system, and reduced grease points resulting in a 35% reduction in maintenance costs. Other improvements include RapidSET™ height adjustment, easily replaceable side channel bolts, and a waterproof lighting loom. Also setting the standard for both safety and functionality is the new Drive Protect System which can be found on all lift options.

APPLICATIONS

✓ Municipality ✓ Golf ✓ School ✓ Lifestyle ✓ Sports Turf ✓ Aviation ✓ Sod Farm ✓ Racecourse ✓ Polo

PRODUCT FEATURES

LOCTEK

A stubless roller bearing system for vastly improved roller retention, alignment, bearing life and minimal maintenance.

SUSPENSION

The Pegasus is fitted with a Duratorque Suspension System capable of highway speeds.

LAZERBLADEZ™

Available in uplift and flat formation to suit mowing requirements, the unique tilt forward design minimizes hang back in tough conditions.

LOW MAINTENANCE

We've introduced new features such as our SteadFast sealed spindles and long life synthetic bushes which has reduced maintenance by 35%.

FULL WIDTH ROLLERS

Full width rollers minimize scalping in undulating conditions and allow mowing over curbs and bunkers. Also aids in stripping.

RAPIDSET HEIGHT ADJUSTMENT

Clearly displayed stainless steel height indicators allow the easy adjustment of cut heights without having to raise or lower the wings.

ROAD TRANSPORTABLE

Equipped with a roadworthy chassis, the Pegasus is capable of being towed at highway speeds (subject to local road regulations).

WHEELS RUN ON CUT GRASS

As the rear deck is located between the rear transport wheels, grass is not flattened by wheels prior to mowing, a feature unique to Trimax.

BELT CAVITY DUAL WASH FLAPS

Provides easy access for removal of grass and drainage of water from belt chambers.

*OPTIONAL FEATURES

✓ HELICAL ROLLER SCRAPERS

Cleans rollers and reduces clumping in wet conditions.

✓ ANTI-BOUNCE / WEAR SKIDS

Eliminates scalping and bouncing and reduces side channel wear.

✓ QUIKLIFT

Raises mower decks slightly without disengaging the PTO. *Not available on 722.*

✓ QUATTRO BLADES

Four blades (flat, upturned or mixed) per spindle for a finer cut.

✓ ELECTRIC UNLOCK

Replaces the standard in-cab transport lock release rope with an electric actuator. This is operated by a push button remote.

✓ TURF TIRE

Distributes mower weight for less ground disturbance.

✓ ROAD LIGHTS AND CHAINS

Add LED tail light clusters and safety chains for road transportation.

✓ GALVANIZED SURFACE COATING

Protect against corrosion in harsh environments. *Not available on 493.*

✓ ON-CALL KIT

Each kit contains bearings, blades, and belts for a quick replacement in the field.

X-WAM

THE ULTIMATE IN WIDE AREA
MOWING WHEN QUALITY
COUNTS.

The X-WAM has superior contour-following abilities based on the unique combination of five individual floating decks on an articulated axis.

With the potential to cut 32 acres per hour and the ability to perform zero-turns without having to lift any of the mower decks, the X-WAM will increase your productivity and efficiency using only one tractor, one driver, and one mower.

Providing an even discharge of clippings and with the ability to mow in wet conditions and produce a reel-like patterned finish, X-WAM is the ultimate wide area mower.

TALK TO US TODAY ABOUT THE CAPABILITIES
OF X-WAM IN YOUR ENVIRONMENT.

SPECIFICATIONS

	1040
Cutting Width	34' 2"
Overall Width	34' 6"
Overall Length	19' 1"
Transport Width	9'
Transport Height	14' 9"
Cut Height Range	3/8" - 4"
No. of Blade Spindles	19
Approx. Weight	10,758lbs
Min PTO Output	100hp

Trimax X-WAM is great equipment. It replaced one tractor, one employee and reduced mowing time. Less equipment to maintain and less equipment expense has increased our profitability.

- LYNN GIBB | Hope Plantation Turf, Texas USA

FITMENT

Trailed PTO driven wide area mower suitable for tractors with a minimum of 100hp.

DESIGN AND CONSTRUCTION

X-WAM is available as a kit to add to a Pegasus 610, or as a complete model. The X-WAM consists of 2 decks and a chassis, and can be joined with a Pegasus chassis for a total of 5 decks. All the decks can be folded and retracted to 9' for road transport. Decks compact down to lower the center of gravity so the machine is more stable on the road. With Trimax LazerBladez™ and multiple spindles with shorter blade beams the X-WAM gives more cuts per forward unit of travel and a finer cut than comparable rotary mowers. The X-WAM uses a monocoque body construction from 5mm plate steel. A proven and simple belt drive system eliminates the chance of expensive gearbox damage and is easily adjusted.

ABOUT THE TRIMAX X-WAM ONLINE HERE:

VULCAN

DESIGNED TO GIVE YOU THE
ADVANTAGE OVER YOUR
COMPETITION.

The Trimax VULCAN is the latest addition to the Trimax range and is the highest return on investment castor wheel mower in the market.

Designed with all the latest features and innovations Trimax has to offer, the Vulcan provides significant long term cost savings for sod and turf farms. Vulcan has been shown to consume 31% less PTO power, which corresponds to fuel savings of up to 13.9% when compared to the current industry leading castor wheel mower.

Subjected to extensive strength and durability testing during development, the Vulcan is incredibly robust, suitable for full-time commercial use and engineered for longevity of life – a feature Trimax mowing equipment is renowned for. The Vulcans 24' cut width paired with Trimax design standards and cut technologies make the Trimax Vulcan the most efficient caster wheel mower on the market!

TALK TO US TODAY ABOUT THE CAPABILITIES
OF VULCAN IN YOUR ENVIRONMENT.

SPECIFICATIONS

725

Cutting Width	23' 9"
Overall Width	24'
Overall Length	20'
Transport Width	8' 1"
Transport Height	11' 8"
Cut Height Range	¾" - 5"
No. of Blade Spindles	11
Approx. Weight	5670lbs
Min PTO Output	60hp

FITMENT

Trailed PTO driven wide area mower suitable for tractors with a minimum of 60hp.

DESIGN AND CONSTRUCTION

Designed to give you the advantage over your competition the Vulcan is up to 13.9% more fuel efficient than competitor mowers. The Vulcan has three floating decks, each supported by its own set of puncture-proof offset castor wheels. Spindles are fitted with Trimax LazerBladez™ which have a unique tilt-forward fling-tip blade design that produces a clean cut with minimal tearing. Trimax LazerBladez™ also encourage faster regrowth and minimize the risk of grass disease.

With highly considered engineering, the Vulcan has less steel-on-steel wear between the major articulation and pivoting components than comparable castor wheel mowers. Using sacrificial bushes and thrust washers, metal-on-metal contact is prevented providing a longer mower life and minimal maintenance costs over time.

The Vulcan has a proven and simple belt drive system that eliminates the chance of expensive gearbox damage. Automatic belt tensioners ensure maximum drive to the blades at all times.

Trimax's meticulous manufacturing standards also ensures all surfaces critical to cut height leave the factory with a perfectly even cut height, every time!

PRODUCT FEATURES

PUNCTURE PROOF SOLID TIRES

These solid closed cell, airless formulated tires do not absorb water allowing superior rolling performance, durability, and no punctures.

GALVANIZED

Provides added protection against corrosion in coastal environments with high salt concentrations or high fertiliser usage.

EASILY TRANSPORTABLE

Compacts to 8' wide for easy transport from farm to farm (refer to local road regulations).

STAND ON COVERS

Aluminium treadplates make up the heavy duty covers that guard the belt chamber.

STEADFAST SEALED SPINDLES

We've eliminated the tedious task of spindle greasing. Covered by our 3-year warranty, maintenance costs are reduced, and productivity is enhanced.

AUTOMATIC BELT TENSIONERS

Automatic belt tensioners eliminate the need for belt adjustments and improves drive to the spindles and blades.

QUICK & EASY HEIGHT ADJUSTMENT

Spacer rings are used to set the height and ergonomically designed handles make it simple for a one-person change in under 15 minutes.

TURF TIRES

Trimax Turf tires help distribute the weight of the mower for less ground disturbance.

SAFETY TESTED

The Vulcan complies with agricultural standard ISO4254 for protection against thrown objects, blade impact, blade unbalance and more.

LAZERBLADEZ™

Available in uplift and flat formation to suit mowing requirements, the unique tilt forward design minimizes hang back in tough conditions.

ADJUSTABLE DRAWBAR

Align the drawbar with the tractor hitch while maintaining a level chassis with one simple adjustment.

*OPTIONAL FEATURES

ABOUT THE TRIMAX VULCAN ONLINE HERE:

FLAILDEK//FX

The Trimax FlailDek FX offers a high-performance alternative to standard factory-fitted rotary mowing attachments.

FlailDek FX has the ability to deliver an exceptionally clean cut and disperse clippings safely and is used by contractors, councils, schools and land owners around the world. A highly versatile mower, FlailDek FX is also able to mulch branches up to 1 inch in diameter, mow high grass and using the unique converter flap is suitable for sports turf and other fine turf applications.

The FlailDek FX has been designed to have minimal maintenance requirements and a low total cost of ownership yet deliver maximum reliability.

TALK TO US TODAY ABOUT THE CAPABILITIES OF FLAILDEK FX IN YOUR ENVIRONMENT.

SPECIFICATIONS	135	155	185
Cutting Width	4' 6"	5'	6'
Overall Width	5' 1"	5' 8"	6' 9"
Overall Length	3' 7"	3' 7"	3' 7"
Cut Height Range	¾" - 4"	¾" - 4"	¾" - 4"
Approx. Weight	520lbs	534lbs	617lbs
Total Belts	2	2	2
Flails per mower	28	32	40
Min PTO Output	Front mount HP's vary between tractor brands.		

"This year I could not have coped without anything other than a Trimax FlailDek, it's versatile, cuts rough and fine grass even in the wet conditions and copes with it easily."

- ANDREW HALL | Truelink Ltd

FITMENT

A front mounted flail mower that can be fitted to a wide range of power units including John Deere, Kubota, Iseki, New Holland and Shibaura out-front power units. FlailDek FX is supplied complete with mounting arms and PTOs to suit the brand of tractor. Minimum hp recommendations vary between power unit brands.

DESIGN AND CONSTRUCTION

The FlailDek FX has a low compact design which mounts close to the tractor. Mounted by linkage arm adapters and quick hitch using one pin, the mower floats independently and lifts high for curb clearance. The front of the body aperture is very open and is fitted with a row of hinged safety flaps which fold back to allow standing vegetation easy entry yet contain any thrown objects. Roller bearings are encased in protective housings. The FlailDek uses a monocoque body construction made from 3mm high tensile plate steel.

THE CONVERTER™ FEATURE

The Converter™ feature is unique to Trimax and changes a versatile "jack-of-all trades" flail mower into a machine that is a master of widely differing conditions. In the short grass configuration it excels when mowing quality turf, lifting each blade to eliminate wheel marks. Move the Converter and the same machine transforms waist-high grass and stalky weeds into lawn in a single pass.

APPLICATIONS

✓ Municipality ✓ Horticulture ✓ Golf Courses (Roughs & Native Areas) ✓ School ✓ Lifestyle ✓ Sports Turf ✓ Aviation ✓ Sod Farm ✓ Racecourse

PRODUCT FEATURES

UNIQUE CONVERTER

Superb short grass cutting ability by creating airflow that lifts grass before it's cut. Open converter for increased productivity in long grass environments.

REAR ROLLER

Full width rear roller prevents scalping, permits the edge of the mower to be run along curbs, adds to overall safety and produces striping.

POWER SAVING FLAILS

Strong forged steel flail with an aerodynamic profile reduces hp requirements yet generates sufficient draft to lift grass for a clean cut.

SAFE CLIPPING DISPERSION

Safety is paramount when mowing in public areas. This is why Trimax has designed the FlailDek FX to expel debris in a downward direction behind the mower.

FRONT CASTOR WHEELS

Front castor wheels allow the FlailDek FX to follow ground contours independently from the tractor. The semi-pneumatic tires are impossible to puncture.

WEAR RESISTANT SKIDS

Wear resistant trailing skids made from abrasion-resistant steel extends bearing life and enables high productivity in the most challenging environments.

NEW IMPROVED ROTOR

Dynamically balanced and designed for durability to withstand everyday use in the toughest mowing environments.

EZEEMOW/FX

**TRIMAX FLAIL
TECHNOLOGY FOR
COMPACT TRACTORS.**

The new EZEEMOW FX is the ideal partner for your compact tractor where versatility and robustness is needed.

With its compact dimension, Ezeemow FX can fit closely to the tractor and manoeuvre into tight corners. Able to mow anything from fine turf to small prunings, vegetation up to 1 inch in diameter and high grass, the Ezeemow FX can transform areas into tidy mown lawn in a single pass. This versatility makes the Ezeemow FX ideal for contractors, councils, roadsides, estates, and orchard applications.

The Ezeemow FX has been designed to have minimal maintenance requirements and low total cost of ownership yet deliver maximum reliability.

TALK TO US TODAY ABOUT THE CAPABILITIES OF EZEEMOW FX IN YOUR ENVIRONMENT.

SPECIFICATIONS	135	155	185
Cutting Width	4' 6"	5'	6'
Overall Width	5' 1"	5' 8"	6' 9"
Overall Length	1' 11"	1' 11"	1' 11"
Cut Height Range	3/8" - 4"	3/8" - 4"	3/8" - 4"
Approx. Weight	436lbs	503lbs	540lbs
Total Belts	2	2	2
Flails per mower	28	32	40
Min PTO Output	17hp	20hp	24hp

"I've been mowing 30hrs a week for over 28 years and my Ezeemow still has the same gearbox. It produces a beautiful cut and if I had to, I'd replace it with the exact same model..no two ways about it!"

- STEVE DE BRUIN | Grass Cutting Services, Tauranga NZ

FITMENT

Rear 3-point linkage mounted compact flail mower suitable for tractors with a minimum of 17-24hp.

DESIGN AND CONSTRUCTION

The Ezeemow FX has a low and compact design which mounts close to the tractor. The front of the body aperture is very open and is fitted with a row of hinged safety flaps which fold back to allow standing vegetation easy entry yet contain any thrown objects. The Ezeemow uses a monocoque body construction made from 3/8" high tensile plate steel.

IMPROVEMENTS OVER THE ORIGINAL EZEEMOW

Ezeemow FX is a total re-design of the original Ezeemow mower with a change in construction to a high tensile steel, a larger diameter rotor (70% stronger) and forged steel Gamma Flails™. A stronger gearbox has been used and an improved belt tensioning system. The full width rear roller is now easily height adjustable.

THE CONVERTER™ FEATURE

The Converter™ feature is unique to Trimax and changes a versatile "jack-of-all trades" flail mower into a machine that is a master of widely differing conditions. In the short grass configuration it excels when mowing quality turf, lifting each blade to eliminate wheel marks. Move the Converter and the same machine transforms metre-high grass and stalky weeds into lawn in a single pass.

WARLORD S3

HEAVY DUTY FLAIL MULCHER MOWER.

The all new WARLORD S3 with its hydraulic sideshift operation makes for a powerful working companion in commercial applications.

We've designed the Warlord Series 3 to be safe and reliable for roadside and contracting work and have maintained our robust build which makes the Warlord the flail mower of choice for hire fleets.

With the ability to shred branches up to 3 inches in diameter and fitted with unique features such a replaceable internal liner, pruning guide and an adjustable rear flap for servicing ease, the Warlord is a serious commercial flail mower.

TALK TO US TODAY ABOUT THE CAPABILITIES OF WARLORD SERIES 3 IN YOUR ENVIRONMENT.

SPECIFICATIONS	175	205	235
Cutting Width	5' 9"	6' 8"	7' 8"
Overall Width	6' 8"	7' 8"	8' 8"
Overall Length	3' 4"	3' 4"	3' 4"
Cut Height Range	0 - 2 $\frac{3}{4}$ "	0 - 2 $\frac{3}{4}$ "	0 - 2 $\frac{3}{4}$ "
Approx. Weight	1455lbs	1653lbs	1763lbs
Total Belts	4	4	4
Min PTO Output	40hp	44hp	50hp
Flails per mower	24	28	32
Rollers	1	1	1

We own two Warlords. No other machine has been heavy enough for what we put them through. The durability of the machine is great - what we ask of it is hard and it does it superbly.

- BRANDON CHAMBLEY | Patten Seed Sod, Atlanta

FITMENT

Rear 3-point linkage tractor mounted flail mower to suitable for tractors with a minimum of 40-50hp.

DESIGN AND CONSTRUCTION

Warlord has a dynamically balanced rotor constructed from 11mm seamless wall tube. Hinged front safety flaps allow a large volume of material into the cutting chamber and prevent material being thrown forward. The Warlord features an easily adjusted four-belt drive to the rotor using SPBX belts. The Warlord has a monocoque body construction made from 6mm plate steel. Warlord comes right hand offset as standard unless specified otherwise.

IMPROVEMENTS OVER THE WARLORD SERIES 2

Warlord Series 3 now features hydraulic sideshift, perfect for maneuvering around obstacles. To control the coarseness of the mulch you can lower/lift the rear flap. The finest mulch is produced with the flap in the lower position. Lifting the flap allows more material to be processed. Controlling the discharge also assists with safety in public areas. Lifting the flap fully open makes for easier flail servicing.

APPLICATIONS

✓ Municipality ✓ Horticulture ✓ Aviation ✓ Sod Farm ✓ Lifestyle ✓ Agriculture

PRODUCT FEATURES

HYDRAULIC SIDE SHIFT

The Warlord can be quickly offset to the left or right by up to 19". Perfect for transport and maneuvering around obstacles while mowing.

DISCHARGE CONTROL

Fine mulch is produced with the flap in the lowest position. Controlling discharge assists with safety in public spaces. Lift flap open for easy flail servicing.

PRUNING GUIDE

Helps direct prunings in and under the mower. Also helps keep debris away from the hydraulic system.

*OPTIONAL FEATURES

✓ HELICAL ROLLER SCRAPERS

Cleans rollers and reduces clumping in wet conditions..

✓ LEFT-HAND OFFSET

Warlord comes standard in right hand offset, but can be configured with left-hand offset. Suitable for contractors who may prefer visibility over their left hand shoulder.

REPLACEABLE INTERNAL LINER

A bolt-in $\frac{1}{4}$ " replaceable internal liner increases the life of the body, minimizes damage and reduces noise.

HEAVY DUTY ROLLER

A robust roller with 8.5mm thick walls to handle tough applications.

REPLACEABLE SKIDS

Skids on Warlord trailing arms prolong mower life in demanding terrain and can be replaced when required.
